With over 19,000 entries compiled by Lyman Tower Sargent, this already is the major resource of critical bibliography on utopia, but we expect it to grow with your contribution. Our aim is to have a complete list of critical sources in any language, add digital objects such as abstracts and full texts, and make the database searchable by subject.

For authors of titles listed here, authors of new titles, and volunteers that would like to become contributing editors, please click [here](#)
