Meanwhile Back at the Barnyard...

HELMUT ADLER;

Abstract

Originally published in Contemporary Psychology: APA Review of Books, 1968, Vol 13(1), 7–8. Reviews the book, The Behavior of Domestic Animals edited by E. S. E. Hafez (1962). The book deals in studying the behavior of dometic animals. This is a most valuable book. It stands as a model in the way it handles the crucial problem of heredity and experience in animal behavior. The word ‘instinct’ does not appear in its index, yet species differences and the origins of typical behavior patterns are treated in a thorough and sound manner. Generally, the weakest parts are those dealing with sensory capacities and perception, the strongest are those dealing with the development and patterns of sexual behavior.
