Laurie Anderson has been exploring the overlapping edges of high art, experimental art and popular culture since the late 1960s. She uses storytelling, ritual, dance, multimedia and her own body to delve into the strange intersections now occurring in American culture. Language, media, physicality and corporate influence are all part of her complex web of performances. She is not afraid to delve into the contradictions of a post-modern society, often both engaging and resisting power structures. A hypertexual guide to 'The Nerve Bible' and other recent works is given.
