Career transitions as an area of research was generally overlooked by sport scientists until recently and also by sport administrators, coaches, athletes, and those closely associated with athletes (e.g., family) who are nevertheless keenly aware of the complex personal adjustments and socio-psychological phenomena involved. This chapter provides an overview of the theoretical approaches and frameworks that help explain the phenomenon, a review of the existing literature, and a summary of future research directions. Specifically, in the first section, theoretical perspectives that have been applied more or less appropriately to sport are summarized. The second section reviews the extant research, followed by recommendations for future investigations. The chapter concludes with a summary and set of ‘what have you learned’ questions.
Carrier transitions—Number of times the interface has gone from down to up. This number does not normally increment quickly, increasing only when the cable is unplugged, the far-end system is powered down and then up, or another problem occurs. If the number of carrier transitions increments quickly (perhaps once every 10 seconds), the cable, the far-end system, or the PIC or PIM is malfunctioning. You would need to do basic troubleshooting to find out why the link is flapping. Learn everything you want about Career Transitions with the wikiHow Career Transitions Category. Learn about topics such as How to Change Jobs, How to Start a Career, How to Reapply for Your Own Job, and more with our helpful step-by-step instructions with photos and videos. Having a strong career change occurs, because a person is not happy with their current career— that might because of the work, the company, the salary, or the boss. No matter what the reason is, you need to identify it so that you make a smart move and not a move that leaves you in the same place. Understanding Your Career Transition. By Randi Bussin. In this article, I will address two concepts. The first is the difference between a career change and a career transition. The second is the different stages people go through as they step out of an old role and begin anew. Transition is an internal shift within you. It means you have reached a point where it is time to let go of an assumption, self-image, or dream. A transition could be precipitated by an external change. Looking for a career transition with exponential, not incremental, progress? In this article we explore the four steps you need to take to achieve this. “You’d better be damn sure when you wake up that you’re doing what you want to be doing as opposed to what you feel you ought to be doing or what somebody else thinks you ought to be doing.” What’s your next big leap forward for your career or business?
