Toothpaste Is Never Just Toothpaste a Dress

Words: 559 | Length: 2 Pages | Document Type: Essay | Paper #: 56278073 |

Toothpaste is neve just toothpaste, a dess is neve just a dess, a ca is neve just a ca in those economies whee consumes have demand fo a vaiety of options and the ability to consume a selection of poducts and sevices. Thee ae seveal economic pinciples at play including demand, custome satisfaction, consume choices and the income effect.

Poducts in counties whee the aveage consume has minimal disposable income such as in 3d wold o emeging counties have demand cuves with a small ange of elasticity. Meaning the ange in pice a consume is willing and able to pay fo a paticula poduct is elatively small. Thee simply is no incentive to povide poducts that consumes aen't wailing and able to pay fo. In developed counties whee consumes have a highe disposable income the demand fo a vaiety of poducts and sevices is much geate. The elasticity of the......

[Read More] references and income allows her the ability to choose amongst a variety of options to maximize her total utility.

Would it be more efficient if there was just one choice and one price? Not necessarily. In economies where consumers have the willingness and ability to pay for variety such as the U.S., Great Britain and other strong economies where residents have disposable incomes; variety is king. While producing just one type of toothpaste or just one type of any consumer product would allow a manufacturer to achieve great economies of scale, efficiency is not the end goal. Serving society by providing them the variety of options that consumer demands is a goal that capitalist societies aspire to achieve. In countries where disposable incomes are higher enables the provision of greater choices at higher price points. |

Functions of Packaging and Preliminary Ideas

Introduction- Toothpaste is a generic term for oral paste or gels that, along with a toothbrush, clean and maintain the health of teeth. Toothpaste aids by providing abrasiveness in removing dental plaque and food from the teeth, lowering bad breath, and delivering ingredients like fluoride and xylitol to help prevent tooth and gum disease. While most of the cleaning is achieved by the mechanical action of the toothbrush, taste, flavor, and color. While toothpaste is never meant to be swallowed, research finds......

Products Such as Crest Toothpaste

Because the Sephora flagship store is located in New York, customers often expect to come in and out quickly, and if the product is not there, they may not patronize the store again, because of the availability of other retailers only a few stores away. This is why keeping detailed information about its inventory is essential. Inventory strategists closely monitor the numbers flow of various products throughout the store. Sephora cultivates a relationship with its brands even before brand appears in the store, negotiating exclusivity contracts and how to position the product.

Discussion 3

One surprising, anecdotal observation is that quite often the lowest-priced milk in cities is not in low-income areas, but in more affluent places. Low-income residents often have less mobility to select where they shop, due to economic constraints (a lack of money for public transportation, for example) and retailers take full advantage of this fact, when......

Marketing Plan for Toothpaste the

Figure 6 resoundingly illustrates how critical reassurance of cleanliness and quality are to anyone who purchases toothpaste.

Integrated Marketing Communications Objectives

First, to conclusively align the snore reduction aspects of the tooth paste with accentuated health through immunity from bacteria and a feeling of cleanliness from using the toothpaste periodically.

Second, to define a unique and defensible marketing position for the snore reduction tooth paste including a unique value proposition that will make it a substitute for snore medications sold by prescription or over-the-counter (OTC). This necessitates creating the snore reduction tooth paste product position as being one of a low-cost substitute for more expensive snore reduction medicines and treatments.

Media and Market Planning ecommendations

The following table provides the media planning for the launch and continued support of the snore reduction tooth paste. As can be seen from the media and marketing strategy the reliance on online spending is......

Marketing, September 22, 36.

4. Specialty toothpastes created for customers with sensitive teeth, gums or other medical conditions, with customer experience being the most critical

5. Lifecycle approach similar to Crest yet focused on the consumer's purchasing lifecycle

Based on this analysis, my top five criterion are as follows:

1. High performance toothpaste capable of delivering preventative protection and has a fresh taste
2. High performance cavity prevention
3. Making dialing brushing less of a chore and more fun and enjoyable
4. Available in a wide variety of flavors
5. High performance, rapid whitening toothpastes that bring quick results to teeth and gums.

Based on these criterion, I have become a loyal Crest Complete Multi-Benefit Whitening + Scope -- Citrus. This toothpaste fits my profile of benefits precisely and has led to my becoming brand-loyal to this specific product based on the benefits it delivers.

2. Select another oral care (e.g., toothbrush) product where......

CPI Marginal Analysis Is an Examination of

Marginal analysis is "an examination of the additional benefits of an activity compared to the additional costs of that activity (Investopedia, 2012). The idea is that for the toothpaste division, the company would only produce more if the profits that it gains from producing more outweigh the costs associated with that increased production.

The number of cases needed to maximize profits is calculated as follows:

$$Q = \frac{0.006}{0.006}$$

So 7000 cases is the point of profit maximization.

Based on the assumption that the toothpaste market is in a state of perfect competition, if CPI raised prices, nobody would buy our toothpaste. Demand would fall because our competitor's toothpaste would be cheaper and would be of equivalent quality. In perfection competition, companies do not have any leverage (Heakal, 2012).

If the market price of toothpaste rose to $54 per case, then the point at which profit is maximized would change. The......

Distribution Levels

Rolex Watches: Rolex deploys an exclusive distribution strategy. Its high pricing is part of its appeal, given that wearing a Rolex signifies one's economic status. Rolex can be bought at high-end jewelers, department stores, and select shopping areas which high-income consumers are likely to patronize.

Coach purses: Coach similarly has an exclusive distribution strategy. They are expensive items of clothing, usually sold at select Coach retailers. These stores are often in exclusive malls or in high-rent districts of urban locations.

Land over sport utility vehicles: Although these vehicles are not the most expensive means of transportation available, they are not universally desired by all consumers. People in cities will likely have less desire for SUVs given that they do not need all-terrain vehicles and are more concerned about the price of gas than their suburban counterparts. However, within certain pockets of the country, and also within certain consumer......

Cp China's Changes to the CMF Marketing

Burton’s objective was to market Colgate Max Fresh (CMF) as global venture. Each country had its own assumptions and trends that would make certain products popular. For CMF to appeal to a Chinese market it had to investigate and target those specific selling appeals.

Del Levin, who was in charge of conducting R&D for Colgate in Asia, discovered that that whilst a potentially huge market existed for the product -- it being that Asia had a large freshness segment -- it had to be marketed in a particular way in order to best appeal to the Asian consumer. Firstly, the name itself - Colgate Max Fresh -- did not appeal as well as other names in China would; the name was therefore changed to "Icy Fresh." Secondly, original marketing that used 'breath strips' was meaningless to an Asian market and......

Direct marketing is another important area of product launching and research. Currently, the Crest hite strips website asks individuals if they would like to participate in a survey regarding the project, upon entry, when accessing the part of the website known as "Ask Dr. Jeff." (Ask Dr. Jeff, Official ebsite, 2004) A new area of the site could be redefined -- instead of the clinical picture of the globe that adorns the site, clickable icons of the different flavors could add color to the 'other side' of the whitening white strips. Think outside the mint strip!

Other forms of direct response advertising could be generated by offering coupons to those who fill out surveys about their response to the product's advertising, giving out a website address to those who buy the product to fill out a survey, in exchange for a chance at winning prizes -- such as a free......

Marketing Case 8 Global Strategies Critically Evaluate

Marketing

Case #8: Global Strategies

Critically evaluate Dolce & Gabbana's decision to launch 15 new stores in China

Dolce & Gabbana's decision to launch 15 new stores in China is a smart one. First, the U.S. Visa process is making it difficult for Chinese tourists to shop here, so D&G will have to take business there in order to get to those Chinese consumers who cannot buy here. Secondly, sales of luxury goods in mainland China were expected to reach $16.9 Billion dollars in 2011, which is a huge market, so G&B is going after some of those Billions. Third, G&B already has 26 stores there, so they are already known in China and G&B already know they can successfully sell in China. Fourth, they can sell a lifestyle of D&G, just as Ralph Lauren did, so that people will buy new products that support that imagined lifestyle.

Sensodyne Is One of the

The flavors are quite simple, as the company chooses to focus more on the toothpaste's health characteristics, rather than the taste.

The product has one size and the packaging is made of plastic, which is more hygienic than metal, as the later one may go through oxidation. This
type of packaging differentiates the product from other toothpastes and marks its individuality.

The product is always strictly associated with the idea of relieving tooth sensitivity and pain from sensitive teeth. The name itself was thus conceived so as to associate the brand with the effect of having used the product.

On the other hand, for a long period of time, Sensodyne was associated with the idea of medication and the company has committed a lot of effort in the last decade to diversify the consumer perception and induce the idea that Sensodyne is less a medication and more of a product……

New Product Planning

Words: 650 | Length: 2 Pages | Document Type: Essay | Paper #: 59588592

Toothpaste known as Crest. The toothpaste which was introduced back in 2008 by P&G, has accrued a remarkable market share because of its merits, nevertheless it has weaknesses worth noting. Of significance, it is patented using a harmless enamel-whitening component that brushes away stains from teeth and smoothly whitens them. It eliminates 80% of teeth stains within 14 days. Crest uses a packaging and logo designed in white and bright blue colors to attract adults seeking whiter, cleaner teeth and fresher mouth. This toothpaste is available in three sizes aimed at individual buying and case capacities aspects that guarantee suitability among different customers (Robertson).

Furthermore, there is remarkable availability of Crest to its end users as the product is offered for acquisition in drugstores, super-markets, discount stores for instance Target and almart, warehouse outlets, for instance Costco and Sam's Club, and numerous drugstore websites found online. This is advantageous, since……

Marketing Products by Embracing an Incorporating Company History

Words: 1284 | Length: 4 Pages | Document Type: Essay | Paper #: 19302086

Corporations and History

Corporations have used their history to demonstrate to consumers their underlying principles in product production and quality. History is vital because it allows consumers to relate to a product and understand that the product is manufactured using the same quality materials. In the marketing of the products, the corporations will use their well-known history to demonstrate to the consumers that they have maintained and will always employ the same principles. The three corporations analyzed in this essay are Coca-Cola, Colgate-Palmolive, and Deere & company. These corporations have used their well-known history to market their products, and they employ the same principles employed since the corporations were
launched. Coca-Cola creates the world's favorite soft drink, and the drink was created in order to offer a sweet quenching drink that evokes happiness (Pendergrast, 2013). The corporation has always aimed at associating its Coca-Cola drink with happiness, and this has……

Goals Statement

Goals Statement couldn't believe my eyes. After all the wrapping paper lie strewn on the floor, I held in my hands the best present I had ever received. It wasn't a Game Boy or a new CD: it was a book called "Chemistry for Kids," and it came with a small lab set. I wasted no time, and immediately set out to perform my first experiments. I felt high as I gathered ordinary household items and watched them change into new forms of matter. My very first experiment was a success, and a practical one, too: I made my very own toothpaste. No many people can say they made toothpaste when they were ten years old, yet with the help of a simple chemistry set and a few materials I found around the house, I experienced newfound joy in my daily ablutions before school.

My homemade toothpaste became a great……

China -- Not Necessarily a

12. Six weeks after that public relations disaster for RC2 Toys, other toy company, Fisher-Price, was obliged to recall "nearly 1 million of its most popular character toys, also because of lead paint," Field continues. Not long after those embarrassing recalls, Mattel and Fisher-Price announced "three more recalls from China" (Field, 12).

When an adult item is recalled, it doesn't make as big a negative splash as when items for children are recalled, so the toy industry was truly rocked by these events. One can also factor in the American economic downturn at the time of these above-mentioned recalls; that is, when people are out of work by the millions, and many are having their homes foreclosed, to have one's hard-earned dollars spend on a product that might sicken family members is doubly impactful on the negative side of the ledger.

Field explains that the recalls have had a "far-reaching……

Bibliography

It is important to note that he does not describe the outputs as products (rown). This is because consumers do not really want a product; they want the benefit they can receive from that product (rown). The example he uses is toothpaste (rown). According to rown, consumers do not want toothpaste; they want good oral hygiene (rown). In rown’s view, the shift is toward providing good oral hygiene to the consumer using the least amount of natural resources (rown).

rown discusses the fact that all resources have mass and that what needs to be revised is how we view that mass (rown). The tube of toothpaste, for example, has a considerable amount of mass (weight of the actual materials used to get it to the consumer), given its size (rown). One must not only consider the mass (resources) used in the manufacture of the toothpaste tube, one must also consider……

Partnerships, Small Business Funding Options, And Marketing

Partnership as a Form of Ownership: Pros and Cons

In the words of Pride, Hughes and Kapoor (2011), “the U.S. Uniform Partnership Act defines a partnership as a voluntary association of two or more persons to act as co-owners of a business for profit.” This form of business ownership has distinct advantages and disadvantages. When it comes to the advantages, it is important to note that unlike most other forms of ownership; i.e. A limited liability company, the establishment of a partnership is regarded relatively easy. Indeed, according to Pride, Hughes and Kapoor (2011), the registration of the business name and securing the relevant permits and licenses are in most cases the only regal requirements for setting up a partnership.

Next, it should also be noted that unlike a sole proprietorship form of ownership, it is much easier to raise funds in a……

The boy just stood there staring at the pile of clothes and cat food and bows. I went over and asked him if I could do anything but he told me that he was used to it. I wasn't actually all that surprised by his answer.

And so I ask myself: Which story of the family are these two telling themselves? Does the boy know that he is Horus and Apollo? Or does he know that he is Bluebeard in the making? Or does the woman yearn to be Demeter? Or is she still aching to be Persephone? Persephone is for Jung a symbol of completeness, for she encompasses opposites -- life and death, mother and daughter, even male and female. The whole eternal cycle of birth through to rebirth.

Then there were two women, well dressed, nice jewelry, standing in the candle aisle. I was there because --

Pulitzer Prize-Winning Novel the Road
If feminism is about civil rights, human rights, children's rights and the search for peace, then it is clear that a substantial amount of the descriptive narrative in the Road is clearly anti-feminine. This has nothing to do with gender rights, and everything to do with the rights of all humans to live in dignity and be allowed "...life, liberty and the pursuit of happiness." The nights, McCarthy writes on page 129, were "...blinding cold and casket black and the long reach of the morning had a terrible silence to it. Like a dawn before battle." The feminist world is not a cold world at all and children are sheltered from suffering; death is not supposed to come to young and middle aged people and mornings are not silent. Mornings are supposed to be filled with the joyful sound of songbirds and the happy shrieks of children, and there is......

It is noticeable, however, that despite illustrating the image of 'good life' among American consumers, it seemed that these ads were catered only to white Americans, which are often depicted as belonging to the elite to middle social classes. Further analysis also showed that apart from the under representation of minorities in these ads, white American women were the 'staple' elements contained in an ad. Although some of the ads appropriately use a woman -- that is, usage of a woman to advertise a food product -- there were also instances in some ads, specifically car ads, wherein women seemed to be objectified. Car ads are classic examples of the objectification of women in advertisements, wherein oftentimes, association between the cars advertised and woman depicted are inevitably linked together, creating the impression that a car is a want that needs to be achieved, in the same way that the consumer......

Marketing Global Marketing 6-1 Demographic

A lot of people suggest that the variety of interior and exterior color schemes, and emphasis placed on safety factors by car manufacturers today, is due to in no little part to their longing to market cars to women, as well as men (7 Demographic Segmentation, n.d.).

Income

Another popular foundation for segmentation is income. A lot of companies target wealthy consumers with luxury goods and convenience services. On the other hand, many target products that appeal directly to consumers with moderately low incomes. "Examples include Aldi (a discount food retailer), Airtours holidays, and discount clothing retailers such as TJ Maxx" (Market segmentation - demographic segmentation, n.d.).

Social class

Many Marketers believe that consumers alleged social class influences their fondness for cars, clothes, home furnishings, leisure activities and other goods and services (Market segmentation - demographic segmentation, n.d.).
Lifestyle

Marketers are more and more concerned with the effect of consumer……

Best and Worst Advertisements

Words: 1582 | Length: 4 Pages | Document Type: Essay | Paper #: 91841187

Integrated Marketing / Best and Worst Advertisements

IMC-Integrated Marketing Communication, is in practice all over the world at a very large scale. The main aim of this paper is to clarify the meaning of IMC, the impact of IMC, and how it differs from the conventional marketing communication. IMC adopts the consumer-based approach rather than the organizational-based approach, as such the focus is on paying attention to the need of the organization. IMC adopts the synergy approach over the isolation approach. Positive outcomes such as greater profitability, unique brand association, brand loyalty, customer satisfaction, cost savings and increased sales. The major impact of IMC is on brand equity and organizational approach. However, certain barriers exist for the effective implementation of the IMC program (Naem et al., 2013).

Water and Plastic Bottle Burden

Words: 1800 | Length: 5 Pages | Document Type: Research Paper | Paper #: 79110006

With this information, people can make informed decisions regarding the water they consume. Which additives are healthful? Which are not? These are examples of only some of the questions responsible consumers should have when choosing their water. Regarding the use of plastics, the solution is simple. By simply changing their habits from plastic water bottles to stainless steel or any of the other alternatives, not only is the consumer choosing something that supports the well-being of the planet, but also supports the well-being of themselves.

This is merely one solution of many meant to work towards a more sustainable lifestyle across the globe. That the consumption of water increased so quickly, all over the world, signifies the impact of advertising on consumer choices. This can be a reason for hope, since just as quickly the use of stainless steel water bottles and clean water can be brought into individual……

Market Consists of All Firms

Market power can exist when there are substantial barriers to entry into the industry. Expectations about incumbent reactions, incumbent advantages, and exit costs all can serve as entry barriers.

The extreme case of a firm with market power is monopoly, where the industry consists of only one firm. Here, industry and firm demand curves are one and the same. In contrast to competitive markets, consumers pay more than marginal cost and the firm earns economic profits. Output is restricted from competitive levels. With a monopoly, not all the potential gains from trade are exhausted.

Monopolistic competition is a hybrid between competition and monopoly. It is like monopoly in that firms under both market structures face downward-sloping demand curves. Market power comes from differentiated products. Examples include the toothpaste, golf ball, tennis racket, and shampoo markets. The analyses of output and pricing policies are similar in the two cases. The difference……

Business Corporate Social Responsibility Corporate

P&G has recognized that there are three pillars needed to support its sustainable development strategy. These include environmental protection, economic development, and social responsibility (MacNealy, 2007).

Summary and Future research recommendations

Procter and Gamble's commitment to sustainability has been shown by its development of new products. Product development is geared towards the preponderance of consumers who would like to improve sustainability outcomes without comprising value or quality. During 2008, Procter and Gamble was able to diminish packaging waste by changing many of their standard carton packaging to a fully recyclable seal tight plastic material packaging. This modification in packaging has resulted in an 80% decrease in the amount of packaging that is being used compared to carton packaging (Lloyd, 2009).

Environmental forces disclosed by Procter and Gamble have included water usage, energy usage, carbon emissions and total waste. The company has reported that energy use at its household care plant……

Gluten Affect Autism Fact or
When processed by a transglutaminase enzyme, it can interact with immunological cells and produce cytotoxic inflammation. In autism, it is believed that peptides from gluten and casein cross the intestinal microvillus barrier and enter the bloodstream. They also cross the blood-brain barrier. In the brain, certain amino acid sequences of these peptides compete with natural peptides, which bind to opioid receptors. These receptors are G-protein receptors in cell membrane surfaces of neurons. Inducing these receptors disturbs the neuronal function and ultimately leads to or contributes to autism (Department of Pediatrics Staff).

Limited Reliable Scientific Evidence

UK researchers investigated more than 30 scientific articles on the effectiveness of the gluten-free, casein-free diet on autistic children (Bastian, 2004). They found one, which provided reliable scientific evidence that the diet works. The particular study, however, was conducted on only 20 children aged 5-10 who had high levels of protein in their…… [Read More]

Happy Yet The Happy Consumer

To afford what is considered a normal, middle class lifestyle requires an individual to work twice as much as people did in 1948 (During 73). While “some cynics” say that additional leisure time and a shorter work week or year would result in simply more time spent in front of the television, the authors raise the intriguing possibility that the reason Americans watch so much television is a lack of creative energy. Americans work more hours than their European counterparts, are twice as productive at the office or factory than their grandparents, yet have less leisure time to enjoy the fruits of their labor. True enjoyment of leisure demands meaningful use of time, rather than the wasted time that comes at the end of a hard day. Sports, poetry, religion, and time spent with family are more valuable than the items that can be bought with money. Perhaps the current…… [Read More]
Pollan stresses the need to cook our own food and reassert the historical and cultural importance of food in our lives. Again this strengthens Pollan's rhetoric and continues the line of reasoning he began in Omnivore's Dilemma.

So it's good to be encouraged by Pollan, who eulogises the pleasures of cooking, and to be reminded of some basic truths. "When you cook at home, you seldom find yourself reaching for the ethoxylated diglycerides or high-fructose corn syrup," he says. "The cook in the kitchen preparing a meal from plants and animals has a great many worries, but 'health' is simply not one of them because it is a given." The final advice given by Pollan encapsulates it all: "Don't eat anything your greatgrandmother wouldn't recognise as food." ("Food Really Does Grow" 12)

The rhetoric of his work is demonstratively evident as his lines of reasoning attempt to make consumers more responsible for...
After going through most of the same routine as yesterday, I stopped at the coffee shop because I didn't have to be anywhere. I received a barrage of texts as I tried to study, and realized I forgot a big consumer culture factor yesterday - the constant communications. I send and receive texts all day, plus email, and messages on Facebook, too. I had not even thought of these things when writing in my journal. This brought two things to mind. The first was how important communication is to our consumer culture. It happens constantly, and without it our consumer culture cannot thrive. One text was about plans for the evening. Which movie, which bar, which restaurant, that sort of thing. Purchasing decisions are impacted heavily by communications.

The other thing I thought about was how much consumerism we take for granted. How could I forget about communications when I'm...
Slips if IT's Not One

Words: 5007 | Length: 15 Pages | Document Type: Term Paper | Paper #: 43071533

It is important here to have some framework with which to discuss parapraxes.

Aitchison, as a psycholinguist blends both the disciplines of psychology and linguistics to give a more balanced view overall. She proposes first two broad definitions for type of parapraxis. (1998: 244) the first is when a wrong item or word is unintentionally chosen, these are generally referred to as slips of the tongue and an example would be, “Did you remember to buy some toothache?” replacing the word toothpaste, which was intended, with toothache, which was unintended. She also refers to these more properly as slips of the brain. Secondly there is a classification of errors that are due to the faulty assemblages of the language within the statement. The word choice is usually correct but the grammatical assemblage of the statement is not. Here is an example she uses of this; “Someone's been......

In general, P/E valuation is a common and reliable method for appraising a company's value, but, as with any method, caution must be exercised.

Discounted cash flow

The discounted-cash-flow method is arguably the most complex valuation model discussed in this paper, but it is often considered reliable because it considers a company's post-sale prospects. In the case of the previously discussed over-valued dot.com, it is easy to see where a potential buyer would eventually develop a cash-flow problem. The company is barely profitable, and it's going to take $5 million to purchase the company, likely creating some debt to be serviced. Perhaps a company with multiple business units would be capable of servicing that debt through the performance of the other units, but clearly the business being acquired could not service such debt through its own cash flow.

The discounted-cash-flow method works well because one of the……
As it may be inferred from the examples above, the U.S.A. is the leader when talking about online campaigns. Other countries’ experiences may look poor in comparison with the American giant even if we invoke the cases of famous European democracies like Germany.

First of all, this country has a parliamentary system which explains why the parties and not the candidates are those who maintain sites. Therefore, Americans enjoy a more personal virtual relationship while Germans are only entitled to a rather collectivist approach. Despite having access to contact information, biographies, details about platforms, the party is the one which counts to a higher degree. This seems to be the only major difference between the two countries’ web sites as their main goal is providing information, an aim that has received the highest rank from Germans, on a four-point scale.

Still, unlike American candidates who are beginning to understand……
The Lego ads, when seen by younger children who “do not understand persuasive intent in advertising,” might feel as if the balance of the world really does hang in their hands -- and an older child might be confused by the overlapping techniques of advertising, which blur the lines between advertising with a persuasive ulterior motive to encourage consumption, and entertainment in the form of cartoons. This confusion might be another reason for the greater efficacy of movie and product tie-ins with children's advertising.”(Briesch, Bridges, & Kim, 2004) This fact is seconded by……

Additionally, James Moss, of Curzon Investment Property, has commented (Khun, 2009) that Dominos and Subway have been successful in the UK market as a result of their franchise models that are almost recession proof. In addition many investors (who want to own a franchise) have found these two chains to be exceptional investments. Additionally, many “Britons are also shunning posh business lunches and choosing instead to head to Eat or Pret for a sandwich (Khun, 2009,9).” The report also explains that “Independent operators (with fewer than five outlets) have increased their market share by 2.2% across the UK’s top 10 cities to further fuel the feeling that many high streets are turning England into ‘fried chicken Britain’(Khun, 2009,9).” The following chart illustrates the most popular cities for Fast Food in the UK.

Number of Fast Food Restaurants by City

London (central) (847 outlets)

While Xylitol was being used elsewhere in the world the United States still have "an abundant amount of sugar available" so it wasn't heard of in the U.S. until it arrived in chewing gum in 1975. While Germans and Italians -- along with the Russians and Japanese -- were using it as a sugar substitute, Americans were still heaping piles of sugar on their breakfast cereal and in their coffee and ice tea.

But today, Xylitol is marketed in the U.S. As "Miracle Sweet," "Perfect Sweet," and "Healthy Sweet" (Gare, 8). Is it more or less expensive than sugar? Gare writes that it is "far more expensive than sugar, albeit recently the price has been coming down low enough to be marketed in items like cake mixes, brownies, muffins, cookies, candies, ice creams and puddings; Gare asserts that Xylitol in these baked items make them taste as least as good...... Power and the Use of Language Orwell's 1984 And Beyond

George Orwell's 1949 dystopian novel 1984 has become almost iconoclastic in its meaning for contemporary society. Almost like the term Machiavellianism, 1984 evokes images in popular culture, along with the author's name as an adjective, and phrases that were used in the book. Even the term "Orwellian" denotes a certain type of society; phrases like "Big Brother," "Newspeak," "Thought-Police," etc. are now part of the vocabulary when describing totalitarian regimes. The novel's premise has become part of a modern archetype, imitated on television, popular music, movies, and even one of the most popular advertisements ever made, the 1984 launch of Apple's Macintosh.

Nineteen Eighty-Four focuses on a new type of society -- repressive, totalitarian, staunch, all-powerful, all knowing, oligarchical, and pervasive. The novel's main character, Winston Smith, is a simple civil servant assigned to the daily task of perpetuating the...... [Read More]

Strategic Planning & Implementation

ST/581
Cosmetics, toiletries and perfumes are an important part of everyone's daily life, from use of deodorant and shampoo to make-up, skin care products and fine fragrances. Personal hygiene and beauty products are considered essentials today as are the use of products such as sunscreens and decay-fighting toothpaste.

One strategy for Oprah company, to which the management of the company looking for is internalization or extending its market. Following this decision company can export raw materials and beauty products outside of the U.S.

Strategic Management

Cosmetics and cosmetic raw materials produced for export outside the U.S. must meet the requirements imposed by each country in which they will be sold. When a product is to be sold in several countries, the most stringent requirements must be met. Therefore, products sold in foreign countries in……

Monopolistic and Oligopolistic Competitions

Comparison between monopolistic competition and oligopolistic competition

Interest Rates

Monopolistic competition is a market structure where a large number of firms sell differentiated products that are highly substitutable to one another but not perfect substitutes. There is a fee entry and exist in the monopolistic competition, and the firms demand curves are downward sloping. Examples of a monopolistic competition are the firms producing clothing, toothpaste, estuants etc. On the other hand, oligopolistic competition is a market structure where there are few firms competing among one another. There is a barrier of entry because of the scale of economy, patent, and the technology involved in setting up the firm and the presence of few firms give the firms advantage to make excess profits. Examples of oligopolistic competitive market structures are automobiles, steel, aluminium, petrochemicals, and electrical equipments. While there are few firms in the oligopolistic market, there are……

Boston Matrix: Innocent Drinks

Innocent Drinks manufactures all-natural juice drinks, smoothies, vegetable ‘pots’ (blended vegetables in small containers), and squeezable fruit tubes. Some of these products are specifically positioned as being intended for children, others are not, although nearly all are packaged in a child-friendly fashion with cartoon characters on the label. These products are designed to capitalize upon the new trend for ‘eating healthy’ and answer concerns about obesity in children. The company’s product range remains relatively limited but like all brand names it has an array of ‘dogs,’ ‘cash cows,’ ‘problem children’ and ‘stars.’

Dogs

The new squeezable ‘fruit tubes’ for children seem like a dubious investment. Parents that purchase Innocent Drinks are attracted by the brand’s pure image. Selling fruit puree in a highly processed ‘squeezable’ format is unlikely to attract the target consumer. Innocent Drinks have a somewhat unconvincing explanation on their website as why these……

Fluoridation: A Public Health Debate

Fluoridation (the adding of fluoride to water) has been a hotly debated health issue for over half a century. Some advocate fluoridation by citing the many oral benefits available through the process, heralding the betterment of public hygiene that has been achieved from the procedure’s inception. Detractors, on the other hand, point out the possible side effects from the abuse of fluoridation, the health problems being experienced around the globe by countries with fluoridated water, and the indelible rights of man. Because the decision to fluoridate drinking water or not affects so many of the world’s population it is definitely a worthy topic to sink one’s teeth into.

The concept of fluoridation began in the early 20th century by a Colorado Springs, Colorado dentist named Frederick McKay. Upon moving to the area from the East Coast, McKay noticed that several of his patients "exhibited strange……

Teeth Whitening Mike Had Often

One day while doing some research for one of his college courses in the library, he noticed a section of books about human evolution and it occurred to him to see whether they had any information about why white teeth were so important in the first place.

According to evolutionary biologists, human beings, just like other animals, evolved natural preferences in sexual selection that cause us to be attracted to one another on the basis of physical features that are indicators of good physical health and genetic material (Margulis & Sagan, 2000; Zuk, 2002). More specifically, features such as well-formed white teeth provide visual cues of good health and immunity systems because the production of healthy enamel requires good health and sufficient caloric resources. Therefore, in addition to providing evidence of good health, white teeth also suggest greater access to food resources.

During early human evolutionary periods, access to food……

Health Transitions More Disease or Sustained Health

There are no deductibles and no user fees nor limits to contributions on the plan. There are also no restrictions on services to be used and no premiums to pay for basic care coverage other than taxes, a far cry from the high deductibles, co-pays and other fees associated with health care in the United States.

Key to this point is the idea that Canadian health care costs less because a large portion of it is publicly financed. The author's note that since Canada adopted their universal healthcare system the Canadian Health Act has implemented a policy of public administration which keeps the cost of health care spending lower and maintains the government's ability to provide health care services to the entire population. The authors argue that public administration is a more optimal choice for keeping health care expenditures down because administration is inexpensive.

Marketing Shampoo -- Selling Sex With Soap

Shampoo's main function as a product may be to clean hair, but when it comes to advertising, no form of marketing succeeds more potently to sell this cleansing product to women than the marketing of feminine sex appeal. 'Buy the product, and be a sexy woman/girl.' This may not always come across as good clean fun in the eyes of the consumer, but, even if us not strictly dirty advertising, the need to sell sex as part of the image to the typical female consumer of shampoo cannot be underestimated. hat else will distinguish what is otherwise a fairly indistinguishable product, other than the promise of sensuality via the right kind of soaping and suds?

While much of Chapter 7 of Reading Culture by Diana George and John Trimbur makes much of how the female body has been used as an image……

Zeolite Membranes Catalyst Is a

Promotes better plant growth by improving the value of fertilizer. Helps prevent plant burning from over use of fertilizers by trapping and slowly releasing valuable nutrients when and as the plants need them.

Improves the cation exchange capacity of soil resulting in less fertilizer requirements.

Natural zeolites make an excellent soil amendment, and are environmentally friendly for landfill dump sites (with the exception of zeolite that has been used as a molecular sieve or filter medium for the removal of radioactive waste or the removal of heavy chemical toxins deemed hazardous by government regulations.)

Prudes nutrient and fertilizer loss through heavy rains, leaching and irrigation, resulting in less environmental damage through water runoff.

The water retention capability of zeolites allows less irrigation applications.

Zeolite is used to reduce offensive odors, especially ammonia from sewage, animal manure and waste water situations.

This retained valuable nitrogen improves the quality of the resulting……

Green Marketing Over the Last

She also mentions the huge energy giant British Petroleum (BP) came up with some honest and effective marketing in its green promotions. And while it is laudable for an oil company to invest in green technologies, BP did it with “appropriate humility that admits its own guilt while setting the stage for conversion to alternative energy sources” (Ottman, 2002). Meantime she says to Exxon, “ake Up!” because Exxon was at that time running "green-themed" ads that spoke to the need to “find more oil.”

In still another green marketing-themed article from Ottman, she writes in the publication in Business that while the George W. Bush Administration “abdicates responsibility for a strong response to slowing down” global climate change, Bush’s lack of leadership on the issue opened a “unique window of opportunity for America’s advertisers and marketers” (Ottman, 2002). That advice to advertisers and marketers is this: using the same effective……

Ada Maria Isasi-Diaz an Analysis

Moreover, Malachi Martin describes the theology as “a freeing from political oppression, economic want, and misery here on earth. More specifically still...a freeing from political domination by the capitalism of the United States.”

Furthermore, though it grew out of the unrest in Latin America "with its political domination by strong-arm leaders and monopolistic oligarchies," viewed by members of the Church as a direct result of American capitalism, the events in Latin America were preceded by a much more basic historical development -- the "rights of man" extrapolated from the French Revolution and re-coined as the "rights of the working man."

The spread of Marxist doctrine in the early twentieth century saw its incorporation into Catholic theology by several prominent professors right up to the time of the Second Vatican Council, upon which Ada Maria Isasi-Diaz certainly based her theology, and pursued her concept of "evangelical poverty": union with the……

Over-the-counter benzoyl peroxide and salicylic acid work great to clear acne — and help prevent it, as well. In fact, if you want the perfect product to get rid of spots for good, try this quiz here. Well, that’s that, then. Save toothpaste for your teeth, not for your skin. It might work to reduce the redness of your spots and dry them out, but there are safer alternatives, like baking soda or witch hazel, which will do the trick without wreaking havoc. Related Content. Have you ever wondered what’s in your toothpaste? Well, you might be surprised. To be honest I was shocked when I started researching the ingredients that go into toothpaste. We have opted to use a natural toothpaste now and so far it’s working out fine. I certainly understand the fact that I’m 53 and been using these major brand toothpastes for years and I’m still here :) jonnycomelately on June 01, 2013 Toothpaste works far better for removing odors and can be used just like soap. Apply a dab to your hands and rub it like you would soap. Apply lotion or moisturizer afterwards. We have all dropped globs of toothpaste into our sinks at some point. But instead of letting it dry into a ball, use a soft cloth and rub the toothpaste around your sink to keep it shining. Once you rinse it, any odors from the drain will also be removed. Chrome Cleaner. Tooth paste is also good for covering up love bites, just apply a little at a time over the love bite, rub in gently, heh presto its almost vanished. Never knew tooth paste had so many uses. Looney Bergonzi August 9, 2014 Reply.
