Personality is defined as the characteristic sets of behaviors, cognitions, and emotional patterns that evolve from biological and environmental factors. While there is no generally agreed upon definition of personality, most theories focus on motivation and psychological interactions with one's environment. Trait-based personality theories, such as those defined by Raymond Cattell, define personality as the traits that predict a person's behavior. On the other hand, more behaviorally-based approaches Personality Types. Analysts. Intuitive (N) and Thinking (T) personality types, known for their rationality, impartiality, and intellectual excellence. Architect Intj. Logician Intp. Commander Entj. Debater Entp. Diplomats. Intuitive (N) and Feeling (F) personality types, known for their empathy, diplomatic skills, and passionate idealism. In our free type descriptions you'll learn what really drives, inspires, and worries different personality types, helping you build more meaningful relationships. Read about Types. 02. Get a roadmap for success. Our premium profiles are for those who want to dive deeper into their personality and learn how to grow and better navigate the world around them. Get Your Premium Profile. 03. What Is Personality? The word personality itself stems from the Latin word persona, which refers to a theatrical mask worn by performers in order to either project different roles or disguise their identities. At its most basic, personality is the characteristic patterns of thoughts, feelings, and behaviors that make a person unique. It is believed that personality arises from within the individual and remains fairly consistent throughout life.
