Ophthalmology: A Pocket Textbook Atlas; revised and enlarged- With 510 illustrations & 50 tables

50 Studies Every Ophthalmologist Should Know (Fifty Studies Every Doctor Should Know). by Alan Penman (Author), Kimberley Crowder (Author), William M. Watkins (Author). $10.00. Integrative Ophthalmology (Advances in Visual Science and Eye Diseases Book 3). by Ningli Wang (Editor). CATARACT AND REFRACTIVE SURGERY view all. Clinical Atlas of Ophthalmic Ultrasound. by Abdulrahman H. Algaeed (Editor), Igor Kozak (Editor). $15.00. OCT and Imaging in Central Nervous System Diseases: The Eye as a Window to the Brain 2nd Edition. by Andrzejj Gryzbowiski (Editor), Piero Barboni (Editor). $8.00. Swept-Source Optical Coherence Tomography: A Color Atlas 2nd Edition. Pocket Guide to Vitreoretinal Surgery. by Jason N. Crosson (Author). $13.00. Ophthalmology A Short Textbook Gerhard K. Lang, M. D. Professor and Chairman Department of Ophthalmology and University Eye Hospital Ulm Germany. With contributions by J. Amann, M. D. O. Gareis, M. D. Gabriele E. Lang, M. D. Doris Recker, M. D. C. W. Spraul, M. D. P. Wagner, M. D. 305 illustrations. Thieme Stuttgart · New York 2000 Lang, Ophthalmology © 2000 Thieme All rights reserved. We have placed special emphasis on the figures in particular. These illustrations make ophthalmology come alive and hopefully will be able to imbue the reader with some of the enthusiasm that the authors themselves have for their specialty. I would like to take this opportunity to offer my heartfelt thanks to my teacher, Prof. The text starts with neuro-ophthalmic and funduscopic examinations, visual fields, commonly used ancillary testing methods, and an overview of visual loss. Subsequent chapters detail a wide array of conditions including retinal vascular diseases, optic neuropathies, disc edema, disorders of higher cortical function, abnormal visual perceptions, diplopia, orbital syndromes, cavernous sinus and orbital vascular disorders, nystagmus/other ocular oscillations, and disorders of the eyelid. Fully revised and updated throughout, the fourth edition of the Oxford Handbook of Ophthalmology now includes free access to the ophthalmic online media bank, a selection of high-quality clinical images and videos for a wide breadth of key ophthalmic diseases. Second edition, revised and enlarged 510 illustrations 50 tables. Thieme Stuttgart · New York 2000 Lang, Ophthalmology, 2nd. Ed. “This book is an authorized revised and enlarged translation of the German edition published and copyrighted 2004 by Georg Thieme Verlag, Stuttgart, Germany” –T.p. verso. Includes index. 1. Ophthalmology–Handbooks, manuals, etc. 2. Ophthalmology–Textbooks. 3. Ophthalmology–Atlases. I. Gareis, O. (Oskar) II. Title. x Textbook of Ophthalmology. We record our sincere thanks to Professor MK Singh, MS, Eye Department, BHU, Varanasi for his assistance in the preparation of early editions of the book. Mr Tapan Chaurasia, MSc and Mr Lalit Gupta deserve our special thanks for editing colored photographs and video of ophthalmic surgical procedures, respectively. Development of Lens The development of the lens begins early in embryogenesis. When optic vesicles enlarge they come in contact with surface ectoderm. Lens plate: The surface ectoderm overlying optic vesicle thickens at about 27 days of gestation and forms the lens plate or lens placode (Fig. 1. 2. Giáo trình - Tài liệu tham khảo (Textbooks & Reference books) 3. 600. Công nghệ (Khoa học ứng dụng) (Technology (Applied sciences)) 4. Y học; Y khoa (Medical sciences; Medicine)
